

About Us

What makes the perfect set of nails?

Some would say it lies in the strength of their foundation, their resistance to splits, peeling, and breakage. Others might say it's the smoothness and beauty of the nails that matter. Or perhaps the true test measures how well and long they can retain the shine of a manicure?

We say it's all of the above.

At Maxus, we believe that a woman's hands should reflect her inner beauty. And the most beautiful nails require not only the very best ingredients, but also the very best care.

That's why our education-based approach shows women how to develop and maintain strong, healthy, beautiful nails. It's why we utilize only environmentally-friendly ingredients and the most powerful rejuvenating formulas. Ceramic powders to reinforce. Safflower oil to hydrate and repair. Silk amino acids as protection from discoloration.

No "filler" ingredients that dilute the mixtures. No dangerous chemicals that cause long-term damage. No gimmicks or false promises.

Just the best ingredients, the right care, and perfect nails.

That's what makes Maxus the premier choice for boutique salons.
